Forecast for Sunday 09 Apr 2023

Weather: Isolated mist and fog patches likely forming in the valleys during the early hours, but quickly clearing once the sun rises. A dry day will follow with long sunny or bright spells, in which it will feel pleasantly warm, especially in the sunshine. Sunshine turning hazier into the afternoon as high cloud develops. Cloud thickening later in the evening, as a band of rain moves in from the west.

Chance of cloud-free hill tops above 600m: 100% through the day, becoming 10-30% into the evening as frontal rain moves in from the west.

Low cloud and visibility: Any valley mist and fog clearing quickly during the morning. Otherwise very good or excellent visibility with high cloud and perhaps some fair-weather cloud above the summits. A change into the evening as frontal rain begins to move in from the west. Widespread low cloud at times likely, with moderate to poor visibility in rain, perhaps even very poor at times in any heavy downpours into the night.

14:00 on Fri 07 Apr 2023	0.2mm	8.2mm	10.4mm

Forecast for Monday 10 Apr 2023

Weather: Rain and low cloud clearing through the early hours leaving a day of sunny spells and showers. Showers could be heavy at times with the risk of thunder.

Maximum wind: 25-30 mph west-southwesterly winds, gusting up to 40-45mph on the hills.

Chance of cloud-free hill tops above 600m: 10-30% to start as frontal rain clears, becoming 50-70% as showers, particularly heavy showers, may cause a temporary drop in cloud bases.

Low cloud and visibility: Low cloud likely at times in any showers, where visibility may drop to moderate to poor, perhaps even very poor at times in any heavy showers. Outside of showers, good to excellent visibilities.

Temperature: **Valleys:** Plus 4 Celsius, rising to plus 16 Celsius.
At 600m: Plus 5 Celsius, rising to plus 7 Celsius.
Freezing level: Above summits.
